

# Bookmarks on the MG Computer

## Finding Facts Fast with Bookmarks

*Bookmarks* is similar to an electronic address book

After a web site's URL (electronic address) has been saved as a Bookmark, you can easily return to that page by clicking its Bookmark.

The Bookmarks on each MG computer record many websites or documents which provide accurate, research-based information. They're organized into alphabetically arranged folders

Even though the following Bookmarks will be useful for your research, understand that

- Some sites beyond our region may discuss pests not in our region
- Even if the pest is here, the chemical management may be different elsewhere
- Always rely on the PNW Management Handbooks for chemical management

### To access Bookmarks

1. Click the word **Bookmarks** in the top menu bar
  - Move the cursor to the link (or folder) of choice  
To see a folder's contents, slowly slide cursor to the right
  - Move to desired topic, then click the desired link
2. Or click the **Bookmarks icon** (third row from top); the Bookmarks will remain open until you close them with the "x" at the list's upper right
  - Click the link (or folder) of choice
  - If you clicked a folder, you'll now see its contents. Click the desired link
